Hi Gye,

Mike's addition to NoLimit is that there are meters and
a mix control to allow the dry signal to be combined with
the limited one. That's huge!!! I love Mike's changes to
all of our existing plugs. They are well worth the money
when you're ready to get serious with Paris. It allows
a new level of control.

Good luck with your rig.

Tom

Subject: I got Paris up and running but----my added pluggins
Posted by gye on Mon, 09 Mar 2009 20:00:43 GMT

Hi all,

I bought the skunkworks pluggins---Limiter EQ---etc----It has been so long
that I cannot locate them on anything I have. How can I get a hold of them
to get these again?

And Don--thx for all the help

I bought the bundle a while ago--I really would like to get the no limit
back and all the others I had.. I payed for them and can probably go find
the reciept somewhere

http://www.ensoniq.ca I went here and sent a message to see if they could
help.

Hi gye - Chuck released the Skunkworks plugs "into the wild" a while back. Go to http://www.parisfaqs.com/ - scroll down about half way and look for a header that says "PC specific stuff...". You'll find them there.

Mike has also taken NoLimit and developed it further; his new version is purchasable at http://www.ensoniq.ca/.

Hey,

After going to Mikes site I saw that he had further developed and also has a stable driver for XP---This is good news. I have been using PARIS for the last 9 years and have still been using the WinSE environment and have been looking for years for a comparible replacement and I still have not found one. I may just migrate to XP and get another 9 years:)

BTW--I am pretty serious about PARIS(I am still one of the original adopters)--I have a MEC with 16 inputs and a spare MEC and card just incase that one fails-----

That is a testament to PARIS--I have had my head down recording for the last 9 years----

I will be using My spare MEC and upgrade to Mikes XP driver and slowly tranfer over to the new machine.

I can't wait to try Mikes version of NoLimit

Again thx for all the help--This forum is still kicking ass 9 years later:)

Mike kicks ass also, he was very responsive aqnd informative.
