Hey all, I'm thinking of updating to v3.0 from 2.2. One of the main issues I've always had with PARIS is the clicks and pops that come with edits while using plug-ins. Does v3.0 address this issue?

Thanks!

Generally clean as a whistle but it's always a good thing to make sure you have clean ends and proper cross fades

Thanks! Yeah, there's nothing like that random two channel stereo plug in that gives you a loud pop because somewhere in your editing field is a 1-sample offset.
