I was just reminded of something, if any of you are even mildly beatles fans and haven't seen the rattles, you really need to.

Dear Chuck,

While there has been a long time since something was ever developed for Paris, I believe your plugz were the last right ?, isn't it about time to blow a new breeze by releasing this reverb you were talking about ?

We cannot wait for this good fellow to make his appearance forever, right?

This will be a nice thing to keep us playing with Paris.

I commit myself in paying for it if this guy will some day appear and ask something for it as I am sure all of us who will download it will agree with that !

Will you relase it for us poor vintage Paris users ?

Regards,  
Dimitrios

Dimitios,

I didn't write the reverb, it isn't mine and I won't release it. Like I said before, if anyone can find Matt, and he says OK then I will.

Meet the ruttles is hillarious. But you have to see the beatles documentary first.

Yes, I own The Rutles on DVD, as well as the complete soundtrack CD. Neil Innes songs are like parallel universe Beatle songs, and he sounds amazingly like John Lennon. It's interesting that "The Rutles" parallels the documentary "The Compleat Beatles," because I believe "The Rutles" was made first.

Anyway, great stuff. "I know you know what you are but you should know by now that you're not me" - From Piggy In the Middle by the Rutles.
