Hi All,

Many of you may remember me from the old group that Chuck ran... We were both Authorized dealers and users of the product line. We have a LARGE amount of PARIS hardware for sale... much of it NEW IN BOX. We bought all the remaining stock from the Canadian distributor (Kaysound) when the line when down. We have what amounts to 8 full systems, and several I/O cards. We even have a SMPTE card available.

I will be doing a full inventory of what we have, but I just wanted to put this here first to see if there was enough interest before resorting to the 'bay.

anyone that is interested in specific pieces can e-mail me directly with a wish list and what they are willing to offer.

send the e-mail to `d a v e e t e k s o u n d d u t c o m`

Thanks for looking! and I'll be back in a few days with a full list!

Dave - EK Sound.
