
Subject: Crackles are back...not on SPDIF though

Well, I THOUGHT I had my "bounce to disk" crackles whipped, but they came back. This time I re-patched and did a spdif bounce and that seemed to cure it. I havn't tried it yet with bounce to disk to verify that the crackling comes back, but I bet it will. I wonder what could be causing this? The last time I did a fresh install of my system (via ghost) and it seemed to get rid of it, for a while. I'm going to try a bounce to disk and see if the crackles return.

The way my system is set up, because of space limitations, and the fact that I have to have my drums basically in the mix position (facing the other way) makes it A FREAKIN PITA to crawl behind the gear and unplug the spdif cable going to the DAC-1 and re-patch a cable loop. I accidentally unplugged something while doing it, and had to rip about half the system out to find it. ERRRRRRRRRRRRRRRRRRRR!
