Thought I'd mention this. I haven't checked HD prices lately, but this looked reasonable. WD 400GB Serial ATA for \$187.50 shipped.

[http://www.zipzoomfly.com/jsp/ProductDetail.jsp?ProductCode= 101254&affiliate=dealnews](http://www.zipzoomfly.com/jsp/ProductDetail.jsp?ProductCode=101254&affiliate=dealnews)

Mike,
I've had a 100 Meg drive on my Amiga and I'm still kicking booty
over here. Been using it since 1990. I do have to delete
about 5-10 Meg every six months or so because it gets full.
Midi and word processing files/OS etc. are all it's responsible for
these days. I've been really trying to get my Cubase chops
up to snuff so I can get into this millennium once and for all.

Hey Tom,
I used my Atari 1040st and Dr. T's for about ten years. The midi timing =
was excellent, and the latency was non existent. I swear that on my =
version of Logic (4.0) there is some minute lag between midi key press =
and tone. I probably would have stuck with the good doctor had I been =
able to afford access to more midi channels sooner. I keep thinking =
about moving over to Cubase for audio, but Paris continues to serve my =
purposes well, as does Logic four point frekin O.
Cheers,
MR
