Thanks for digging this up! There was so much excitement around PARIS at that time.

I still feel that way.

All the best!

I'm with ya Mike. For me to still be loving PARIS, 16 years after I bought it is amazing. It still has ballz and with Reaper and Nebula my PARIS mixes sound fantastic and on par with all my SSL console mixes!

Ditto. I've been with Paris since '97 version 1.81.

I send all my PT tracks to Paris and use it's mojo to warm it up. I also master clients mixes with Izotope 4 in Paris and they don't know why it sounds so rich. It's like an analog sweetening to any sterile sounding mix.
