Sweet! (And it comes in the same color as the delay pedal I already
have! No one will be the wiser!)

;)

Nice..

But on a serious note, what with the "boutique" distortion pdeal market these
day. It seems that evertime I pick a music product catalog, there are at
least 5 new $200.00 distorion pedal and fx pedal being sold.

I am guitar player and been playing for over 30 years, and I'm shocked at
what the asking price for these products. I don;t think they are worth it.

For that matter, like my guitar tech has been stating for many many years..'If
you pay over $600.00 for a Strat you 've paid too much..

Well I don't have a pedal with Eldridge or Huey on it, but you
can get the best distortion pedal I have ever heard right here
for 150.00. Amazing pedal.

I don't understand using pedals for distortion. What do they give you
that amp distortion does not give?

Oh, they give you a bunch of new colors that you couldn't get with
just an amp, and are a lot cheaper than owning 10 amps!

Also, too many amps are designed with current-starved power
supplies to ge that "sag" that some folks like. I hate it. I like the
robust tone and clarity that come from a solid power supply and
if I want sag, I use a dang compressor. Sooo, the sound of a really
solid amp with a great pedal into it is different than an amp that is
running out of current. Quite a bit different.

For me personally, I prefer amp distortion - I have a Sovtek
50W Tube head that, combined with a 2x12 Celestion cab, gives
me a tone I like; but for recording other people, I also have a
Line6 Spider II amp & a Line6 Tone Core distortion pedal...
those things along with a choice of guitars allows you a wider

range of options in order to get complimentary tones on anything from basic tracks to overdubs (ESPECIALLY when you're doing doubled parts & such). A musician might have a rig that's either crap, or that might even be good gear and gives them a great "live" sound, but not so much for recording purposes... so, things like pedals & modeling amps & a few guitars with everything from Fender single-coils to humbuckers to P90's can give you a wider range to offer.

On the last project I did, the two guitar players used ONLY my guitars, one of their amps, my Line6 amp & my Sovtek amp for various parts. On the one I'm currently working on, the main guitarist so far has used one of his guitars & three of mine, the other guitarist hasn't used his guitar at all, but has used two of mine... amps on this one have been a combination of the main guitarists Mesa triple rectumfryer & my Line6; No pedals so far   :)

Neil

I swear I saw that logo on the instrument my Doc was using on my last colonoscopy...

of course, it coulda been the drugs..
