By the way - new feature added to the forums, YouTube embedding. Hopefully we'll get a button up to automate this at some point, but for now just copy the video's YouTube ID (this one's ID, for example is "5YGc4zOqozo" and type "YOUTUBE" open and close tags on either side. The finished product should look like the following (replace my angle brackets with square ones):

<YOUTUBE>5YGc4zOqozo</YOUTUBE>
