I just really hate the new 2.0. It's absolutely wayyyyyy overblown with unnecessary crap that makes it basically scooterfucked IMO. If I buy EZ Drummer 2.0 and DFH Superior, will I have a decent sample library with percussion instruments and will I be glad I did or does it suck too? I just want something easy to use that sounds good. the only thing I can think of that suks worse then the new BFD is the old, original DFH.
