Can someone enlighten me why these sell so cheap ?

Can someone use these cards as eds cards and run some older protocols daw program and have a vintage protocols system ?

What am I missing here ?

Thanks

Dimitrios

The Olderr mix farm cards are ..what...8-10 years old. AND, they are still in use . There are still more Pro Tools Mix systems in use than, HD systems.

You can use these farm cards with PT versions up to 5-6.0..The, It's HD all the way..

3 cards will get you 64 track, and a mixer, with some juice left for modest powered TDM plugins..

Hi,

Thanks !

So with these dsp farm cards you don't need any min card attached to them or from it right ?

Can these work on PC ??

These go wy under 50\$!!

Is there any other catch ??

Thanks

Dimitrios

What, other than the catch that you have to use ProTools? ;)
