[View Forum Message](#) <> [Reply to Message](#)

Lightening, thunder, and rain, oh the rain...

After several glitches in the power, now, for some reason, the safety switch has tripped, which of course cut power to the server. It seems that the safety switch is only on some circuits though. I've run a lead to another socket and the server UPS is getting fed mains again. Wouldn't surprise me if I lose power altogether soon though.

Now to work out why the safety switch wont reset. I'm wondering if water has gotten into the wiring somewhere... something's not right. Between the wiring in this house, and the electricity in this street, I'll be lucky if this house doesn't burn down one of these days...

Cheers,
Kim.

Soooo.....I guess we need to buy you a new house?

;O)

Well, I found what tripped the safety switch. A small leak has emerged right near, would you beleive, the NG server, and a few drops have water have landed in the NG server monitor, causing a short which has then tripped the safety switch.

The server itself looks dry though. I think we're safe. I have a million 15 inch monitors if that one doesn't work when it dries out...

Cheers,
Kim.

Well, it's like I was saying with the UPS, it works out much cheaper if we just all chip in, than if I have to pay for the whole thing. See, at last roll call a year or whatever back we got well over a hundred replies. So if we can get 100 people to just put in a measley \$5000 each... ;o)

I've got a Paypal account!! :o)

Cheers,
Kim.

i'll just transfer by pp balance over to you to get the ball
rolling...just name a room after me.

the footballhead suite

After I had finished renovations back in 2000 it was time to turn the heating system back on.

I went down to the basement, fired it up and heard the sound of running, dripping cascading water coming from upstairs. Ran upstairs to find that I had never capped the input side of a radiator I (permanently) removed from the 1st floor bathroom.

Ran back to the basement to find water showering all over the old ibm netfinity that ran the newsgroup. Darn thing never missed a beat.

Chuck

Hehe, well hell.

This was just a few drops. Just happened they made their way in through
the vent in the top of the monitor.

Actualy running water... now that sounds troubling. ;o)

Cheers,
Kim.

Excellent! ;o) That looks like just the ticket!

I'll bet it's more likely to have stable power than this place. ;o)

Cheers,
Kim.

What about the wintertime, or isn't there something like that where you
live?-)

Cheers
Erling

Hehe. Yes, we have winter, though I've heard people talking about the idea that the European seasons don't really apply to Australia, and that we should have six seasons or some such thing...

....but despite this talk, and despite global warming, Melbourne still has a fairly cool patch especially around July/August. And much as I see a certain romance in living in a straw hut, it really wouldn't be warm enough, nor waterproof enough. ;o)

Cheers,
Kim.
