Subject: OT - E-mu sync daughtercard
Posted by pbraun on Thu, 08 Oct 2009 05:09:21 GMT

Anyone know where I can get one of these beasts?

I was just given an 0404 pci card, and can put that in my second XP box running some sort of sequencer. I can tie it to Paris with MTC or WC, but I need the daughtercard for that. Apparently, E-mu doesn't sell it standalone anymore, only as part of a bundle with a much more expensive system.

None of the online dealers seem to have them.

Anyone got a lead on one?

Thanks.
