If I do a fresh install of 3.0 how do I get the codes? I have the discs from 2 systems I have but I think I need a fresh instal because of a computer malfunction. Is Ensonic still supporting new code?

I'm only new at this, but my understanding is that there are no more unlock codes coming from ID for Paris 3.0

You have to either get Mike's Pace-free version 3.01 with new Win 7 driver or go back to using Paris version 2.x (on Mac OS9 or Win XP or earlier Win OS) which had hardware based copy protection rather than the Pace system. What OS are you going to run on your computer?

I'm sure some of the experienced people will jump in to clarify/correct this.

You know it has been so long since I had to reload Paris that I forgot that I bought Mike's drivers for Windows 7. I did a fresh install last night and everything is up a going again. I had a crash when I updated the new ILOK program and Paris went crazy so that was the reason for the fresh install. I think I am going to try Mike's new drivers and incorporate Reaper. Thanks for you reply.....Ron
