I'm selling my PARIS rig and thought I'd try here before Ebay. It's all been racked in my smoke free home studio and most everything is in like new condition and great working order unless otherwise noted. All black unless noted. Prices include shipping to the lower 48 USA. Paypal payment preferred. Also, if anyone is interested in buying the whole shebang, I'll discount. I would also sell the Mac dual 1Ghz G4 with version 3.0 PARIS software and loads of plug-ins that used to run this system if anyone wants a turnkey system.

I don't get a chance to check the group real often anymore, so contact me by email if interested or you have questions. Tony at standinghampton dot com.

3 - EDS1000 cards - $225.00 each

1 - 8in card (Blue) - $200.00

1 - MEC (includes power and SCSI cables) - $65.00

1 - MEC (includes power and SCSI cables) - $45.00
I purchased this unit used and it has a couple small scratches on the front. The fan was also not functioning, but as has been noted here in the group, it's probably not even need unless you load it up with several cards. It never got hot and I've never had any problem with it in the three years I've used it.

1 - 442 (includes SCSI cable) - $50.00

2 - C16's (includes CAT5 cables) - $65.00 each

1 - IF2 - $20.00

Thanks for looking,

TonyI guess I should have checked what the recent going prices were on this stuff.

I will entertain all offers (you know, take em' out for dinner and drinks.
Put on a little magic show. Do my famous "dance of a thousand veils". That
