(Trying To Install Paris Pro 3.0).How To Crack This Version Of Paris????

Thanks

mario.roso@os.t-com.hrl'm sorry to hear that. You are the exception to the norm. I think Apple is wrong for not replacing the whole system. People in the mac community have said for years to not jump on the latest hardware until it has been proven in the field. The beige G3 was another example of that.

If you decide to go to tiger, put it on a test drive first and run it for a few months before you commit. Tiger is still not ready. Safari, text edit and GarageBand crash in tiger. I'm running Mozilla right now. I'm going to reload Tiger and all the apps. to see if that helps. If not I'm going back to Panther.
