Ok, you guys seen this?

This is an amazing tool especially for recording guitars direct.

<http://www.fractalaudio.com/>

This is a revolution in processing and quality for amp emulators and FX. This guy has really good ears and this box finally starts to deliver on the promise of amp modeling and the FX are stellar.

Cliff regularly releases updates and posts of several forums, so the product gets almost real-time feedback.

I want one. Take a look.

Murders it, and you get Eventide-quality studio effects to boot.

Someone I know actually recorded some clips totally dry, just amp sims and challenged anyone to tell the difference with real amps.

The Vox is a good piece, and for bands where the guitar is not front and center is fine. What is bitchin' about the Axe-Fx is that it is winning over the "tubes only" guitar guys. The routing, customization, effects order, and much more is beyond anything else out there.

I want one. Oh, and I want the Ultra version which is 2200 something.

So where are the dry clips? The stuff on the site is OK, but not really mind blowing.

.....sweet.....

I can see/hear why you'd want one of those. Any idea what Peter T is using for an axe? The notes are VERY well articulated, I can hear the wood in the gtr tone and it's nicely sustaining/singing. Beautiful tone IMHO..... but that price tag is harsh. Still, if I was a full time gtr dude, I think I'd have to have one of these.

The guitar player in my band recently got one and loves it. Awesome sounds, to say the least. He had to wait about 6 months to get it, IIRC.

Well, those are pretty impressive. Sounds like the best modeling I have heard so far. I'd like to hear more Twin sounds. That's the one I use mostly.

I wonder how it would work with my rig. I run a Tonelab through a Mesa Boogie combo effects return (no preamp). Could it be too tubey? Nah.

I understand the clean sounds are wonderful, but because everyone  
doubts it can do dirty convincingly, that is what everyone does  
on the clips.

If I hear of some clips like that I will let you know.

Hey folks,

Haven't been around much lately, but I just poked my head in today to see what was happening and saw this thread. Coincidentally, I happened to get to hear one of these at the East Coast Amp Show this morning ([www.ampshow.com](http://www.ampshow.com))

If you aren't familiar with the amp show, its run out of a hotel. Each manufacturer gets their own hotel suite to show off their amps, so you can actually play a 50 watter full open. Very cool deal.

Anyway, fractal was in the second or third room that I wandered into. I thought it sounded decent but definitely was not blown away. Then I got to hear more and more tube amps, and the fractal simply faded into the background.

It wasn't in the same league at all. It suffered from the same thing that most amp modelers do, a lack of immediacy and 3-dimensionality. It was playing out of a decent set of monitors (QSC), but they were full range. I imagine that it would feel better out of a slightly driven tube power amp with some 12" guitar speakers.

I actually own a 1st generation Vox Valvetronix amp, and I can say without hesitation that the Vox sounds much better on the clean to crunch tones.

With higher gain, it might be a tossup, but I never cared for the high gain models on the Vox. A big difference is that the Vox still responds like an amp. It still has the punch and impact that the Fractal lacks. I can't speak for the pedalboard version of the Vox, especially if you are trying to do DI. My Vox amp sounds lousy run DI. In a DI contest, the fractal would surely win.

If I were looking for a rig to do DI recording, I might consider the fractal, it might be the best solution on the market. But for a live situation though, the amp felt limp and flat and simply doesn't cut it for me. I also don't think it will compete with most real tube amps with a decent mic and pre for recording. I remember that I was blown away by the Pod when I first got it. I sold it 6 months later. I think this might be one of those type of products. A few other folks I spoke with at the show seemed to share my opinion. "Not bad for modeling, but..."

Standouts in the tube amp department for me were Reason Amps and 65 Amps. Ooh la la....

Regards,  
Chris

Thanks for the comments. Aren't the amp shows great?

I see it as a really killer direct recording tool. I need to hear one in person.

There are people who love them live, but others who feel as you do.

best,

DC

I'm hardly surprised by your opinion. I use a Vox Tonelab into a Mesa Boogie Satellite 60 combo 1x12, but without the tube power amp and speaker I would not use it - or any other preamp type for that matter. It's the whole package that makes it work.

Yup, it's about the package on stage for you and the DI for the sound man.  
They ain't the same animal IMHO.  
Friend of mine's using a Dr Z and a Tonelab, and he's a serious, serious  
player and snob. When I was working with him I loved the DI aspect and  
usability/consistency and he loved the Dr Z (on a Hot Plate) for his stage  
vibe.

Hey, I currently have a cheap mexican strat guitar and it's got good sound and I play through and AX 212. Nothing special here. I've been intrigued by the Brent Mason Valley Arts Tele that is a go at tele, strat, les paul sounds all in one. So.....3 questions what's the cheapest way to get those awesome sounds?

is there a better guitar you like?  
what amp to use for stage  
what di to use in studio?

Easy question huh?

hehe,  
Thanks,  
John

John, I like the multi-pickup idea of the Brent Mason better than doing the two humbucker split/tap/series/parallel thing in order to approximate a Fender. I played a PRS yesterday (its been a while) and I didn't care for the 5-way rewire options to get the single coily sounds. I've also owned a few guitars with 4-wire humbuckers which also never did the single coil thing well enough for me. However, my approach to getting different guitar tones might be extreme. I own 22 guitars ;-)

1. IMHO, the cheapest way to get all those sounds would be to find a nice \$200 strat copy that you like and put on a good humbucker in the neck. If you find the right hunk of wood and get a pro setup with fret leveling/redressing, some cheapies can be quite decent and vibey. If you have a little more cash, build a parts guitar. Still, it's always going to be a compromise in my opinion.

2. A better guitar that I like? I'm rather partial to my '61 ES-175 or my '66 ES-335 ;-)

3. For stage, I use a 50W '77 Marshall 2204 rev with a matching cabinet containing greenbacks. I need the higher gain for my live band, and the Vox doesn't cut it for me.

4. For my DI, I usually use my home-built Gyraf G9, which has a transformerless 12AU7 instrument input:

[http://www.gyraf.dk/gy\\_pd/g9/g9pd.htm](http://www.gyraf.dk/gy_pd/g9/g9pd.htm)

I also use a home-made Alembic F-2B (attached) for bass.

I generally dislike DI guitar/bass though. I never DI guitar unless I plan on re-amping. I always do a DI bass track, but I only wind up using the DI bass about 50% of the time, and usually under a miked bass channel. I don't use any modeling DI/software.

-Chris

The cheapest way? Practice. A lot. Brent Mason could probably make your Mexican Strat sound like a million bucks. One of my favorite Chet Atkins stories is the one about a guy watching him work in the studio who kept saying "Boy, that's a great sounding guitar!". Chet put it on a stand and stood

back and looked at it for a minute. Then he looked at the guy and said "How's it sound now?".

Good luck!

Gantt

Amen :-) I still think the best punchline of all time was when the blues brothers stopped in on rays music shop, and complained about the action being worn out on the keyboard :-)

I liked the one by - was it Herb Ellis? Master guitarist is touring around with different pickup rhythm sections. One night he winds up doing a duo gig with a fire-eating young bassist who spends the entire night playing pyrotechnics above the twelfth fret.

After the gig the guitarist says to the bassist - "Man, you sound great! You and I should hire ourselves a bass player and do some gigs."

Then there's the one popular amongst the old guard here in Vancouver - "That sounds great! Hey, listen, could you take that up an octave and leave it out?"

- Kerry

I came to think of a wonderful concert with Jan Akkerman, the famous Dutch

guitarist from "Focus" in the seventies, that had been booked for Stavanger, my home town, after leaving "Focus". When asked if he needed some gear for the concert he said: "Only a 100 watt amp with a speaker or two, whatever type you can get."

I freakin' LOVED Focus back then...

Especially the yodelling.

They were really special with their kind of symphonic rock music. Remember well the concert they had some years before Akkerman in Stavanger. The organist was most of the time doing his best trying to push down the organ when playing:-)
