I would like to move up to V3.0 from V2.2.

How can I get the update or software and anything else needed to make this happen?

Thanks
Gregory A. McNeer

Hi Gregory,

You could try contacting Intelligent Devices, but I don't think they sell 3.0 anymore. I would try, though.

The other way is to keep an eye out for a used copy on ebay. One might come up with a used system.

I hope this helps.

Mike
