Subject: Any known issues with 865PE chipset & Paris??

I'm thinking of trying to use this computer for an XP/Paris setup..

Gigabyte P4 Titan series motherboard with 865PE chipset (model
GA-8IPE1000-G) with a P4 1.6ghz processor. The board has 5 PCI slots.
According to the bios, slot 1 & 5 are sharing an IRQ, & slots 2,3,4 use
their own.

Does this sound like a possibilty or are there issues im not aware of?
