Subject: Good Wrapper for Paris besides FxPansion 3.3 and non working plugins List?
Posted by Tom Bruhl on Mon, 02 Mar 2009 18:53:02 GMT

Hi Everyone,

I am having some Paris crashes and Windows says it's
FxPansion. It never tells me it's a particular plug in.
I'm wondering if there is anyone using another wrapper
beside the maybe not multicore compliant FxPansion 3.3?

I will also gather my list of plugins and post them here.
If anyone knows of any of them being suspect I'll remove them.
Mike A. suggested removing expired demos from UAD.

Thanks for your input!

Tom
