(also posted to the "For Sale" group)

OK, here's what I've got left:

\* Groove Tubes GT66 LDC Tube mic \$350.

\* B.L.U.E. Blueberry w/wood box & B.L.U.E. shockmount/windscreen  
\$700.

Both in minty-fresh condition.. pics here:

<http://www.saqqararecords.com/html/4sale.htm>

Stuff that's not really something you'd need to see a pic of:

\* Creamware/Scope Pulsar Project Card & SyncPlate \$750.

This is like basically getting a brand-new Project card (used less than a handful of times) for \$50 off street price, and getting a sync plate thrown in for free. The Project Card has 6 SHARC DSP chips, and this version is one with the "puls" i/o options - balanced analog i/o's, 2 lightpipe in's, 2 lightpipe outs, and MIDI in/out/thru. For those of you who haven't seen these, it's pretty close to the size of an EDS card. You can get more details here:

<http://www.infinitevortex.com/creamware/scope-cards/project/>

\* MOTU Symphonic Instrument. VSTi, sounds nice & clean, well-recorded samples it seems - it's just not my cup o' tea. Has a built-in convo reverb! License is via iLok (included). \$200.

Info link & demo clips here:

<http://www.motu.com/products/software/msi>

Paris gear-wise, I would consider a trade or partial trade for an 8-in module and/or an ADAT card.

Other-gear-wise, I could use a superclean/superfast preamp like a Massenburg, or something of that ilk. Could use something interesting in the way of compressors.

Depending on what you were trading to me, and for which of my stuff we were trading for, I'm open to working the cash portion (if any is needed) in either direction.

e-me at: neil DOT henderson AT sbcglobal DOT net

Neil

Hey Neil

what is the sync plate?

The SyncPlate is a word-clockable device that has BNC insies & outsies, and has a cable that attaches to a plug assembly on the DSP card. It enables you to slave the pulsar card to external devices, or have it act as a master clock for external devices. It fits in a PCI slot for the purposes of mounting it, but has no actual PCI bus connections. They're normally about \$200 street price.

If I could I would...in a heartbeat but unfortunately we have some major house expenses coming up that will require the temporary maxing out of the cards in the event financing of said expenses gets held up....now should the financing come through and your card is still available I'm sure we can work out a amicable arrangement i.e. I give you cash, you give me card(s)

:-)

Just roll the price of the cards into the financing.....and surely your home repairs will also need a DW Fearn preamp and and a Telefunlen U47 in order to be complet4ed properly.

;o)

I think I mentioned that to SWMBO and got a rather nasty look...you see there's a work shed with her name on it (among other things that have to be done) and if I steal from the workshed to pay Neil, well all I can say is I hope Neil has a spare bedroom

;-)
