.....actually I'm doing ADAT transfers today. I've got an XT 20 here and for some &^%\$^!!!! reason I can't do a dump from ADAT to Paris using the Paris ADAT mixer thingie so I'm having to record from ADAT to Paris.....and this is about 6 hours of panel discussions that I recorded at an event last fall. I'm about ready to slit my wrists I'm so bored.

So obviously you weren't able to use the autotransfer function either. Such a drag.....

Yeah, I've done it a long time ago, but quit messing around with it, \*and\*  
it never has been much faster for me so I just gave up on it. Makes me want  
to ditch these adats and pick up a hard disk unit (at some point).

I have a LX20 and it works fine with Paris's Adta card. The sync is way too easy..Just set the begin TIME.. bOOM..
