3 x IF2's
1 AES output module-the only one in existence that I know of.
2 x Paris 3.0 OS CD's and a bunch of earlier CD's
Brian T DVD
I think I have kept all of the front and backplates I ever had so there will be lots of those included.
Whatever operational manuals I have here.
I'll even include the ASUS A8V Deluxe mobo, AMD 2800 CPU, IG RAM and the system drive which is preconfigured
