Someone asked me for this but I lost his email address so he and you can see what I made to the power supply of Paris, simple but effective...

Thanks Chuck for the plugins !!!

What's the advantage of this mod and how much would you charge to do one?
-Will

D my man. I understand what you've done.. what I'm not sure is why/why
posted it? Wouldn't power supplies vary enough from brand to brand and
design to make this a dangerous thing to suggest generically?

My understanding is that this is the power supply for the MEC that he's talking about, hence you would expect them all to be pretty similar.

Cheers,
Kim.

He posted a while back saying that he had a mod which he beleived improved the sound quality of the MEC. I assume he's simply showing what he did.

Cheers,
Kim.

SORRY GUYS !

I thought it was obvious that it was MEc !

Yes indeed this is for mec only , MR Petinato (did I rememer his name right ?) kindly sked me some god time ago for a photo but since I lost my mail contacts I thought of posting it here s maybe some others could benefit from it.

Yes if you don't know about elctronics don't do this by yourself.

Even with a power off you could get a small bump from the electrolytic.

This mod gave me a better transient response , not so softening sound from Paris converters.

If anyone could send me the email of Mr Petinato the uy that sells Paris stuff so I can post this directly to him...

Thank you and sorry if I upset you somehow with no explaining from the very start.

Regards,
Dimitrios

Hi Dimetrois,

One of my mecs has a blown power supply. I would love to know what power supply you use to replace. Thanks.
LaMont
