But it can't be fresh gaffer tape -- it needs to be vintage tape.
Nothing in the world sounds like vintage '77 black gaffer tape.
Especially tape made in Keokuk, Iowa. In June.

pabWOW!!!! How friggin cool is that???? I *need* that!!!! If I don't have that
I will.....errrr.....well, you know.

ack.. out of phase until it cancels the most? Then render the
dobro.. lather, rinse, repeat for the worst tracks. Too much of this could
cause all kinds of phase nightmares, but it might enable you to clean off
enough funk to deal with the mix tones.

>Right after I posted this I found the *major* culprit. The vocal frequencies in the doublebass were absolutely the problem. Luckily, there's lots of room for surgery in the upper midrange of a doublebass, especially in the contest of a mix. I did some major carving. Cleaned it right up. I'm back to doing my other little tweaks that I wanted to do (in a bit more conservative manner) and things are holding together.

Thanks for your thoughts. I must have been readin'yo'mind.

yway, sorry if this post is a little confused, but I AM a little confused right now. Maybe I just need to vent a little bit, but hopefully a beneficial discussion can come of this.

Thanks,

Joey Bee

Interesting link. Chock full of ignorant bravado and riddled with logical fallacies. Proof through aggressive assertion and repetition, generalizations, simplistic metaphor, thin on facts, heavy on allegations. Nice rant. Long. Off the mark. I'm not surprised that comments were removed. Very entertaining.

If anyone wants to dissect it further, start up a thread on PARIS/general.

Cheers,

-Jamie K
