Hi to anybody who's looking for an EDS card.

There is a seller on ebay called "chuckroberts" who is currently selling an EDS card, and says this is one of 4 cards and that he will be listing other Paris gear as well.

I was in conversation with him about buying the card and an 8-Out board if he had one, but he suddenly went dark on me and removed the international postage. So this is for somebody in the US.

I did ask why there was flaky stuff on some areas of the card, because with only photos to go on I had no choice. No answer, and my messages are now blocked as well. Next time I'll keep quiet.

My loss is your gain!
