I've read really good stuff about the True Systems 8 channel unit, but I'm not sure if it has lightpipe. A friend of mine who runs a Nuendo system actually thinks the new Mackie Onyx 8 channel unit sounded pretty good for the money. I haven't heard it yet myself, but he said it was clean and didn't color the sound to ears. He's one of the few people I personally know who's ears I respect, for what it's worth. Some ideas there anyway.

finally expired. Have been looking at possibly ASUS ABIT MSI Shuttle and
EPOX. I can get a new feature loaded EPOX 8RDA3+ pretty reasonable or look
for the others used on ebay - prices in \$70 range. Also can pick up a new
nVidia FX5200 dual head video card cheap, or a MM G450 real cheap. The
nVidia chipset boards have a little better performance, and I've had good
luck with their video cards. Any tips on what works well or not with
PARIS?Yes, and they make nice little space heaters too!

ion on the DLP.

That's been my experience anyway. Also, watch some action shots on both
units. There should be less blurring with the DLP's. And yes, TV's are
almost like computers now. Obsolete in 12 to 18 months. Another penny and
half for you. ;>)
