I am currently recording on PARIS 2.1 with the "bootlegged" XP driver. I run thru my MPC 2000. I am having a problem with some tracks recording at a faster tempo than others when I record them alone. Can someone give me a hand here?

Peace

Make sure the sample rate is the same on each track.

I don't understand your question or use scenario. Song tempo should make no difference to PARIS. If you're trying to slave PARIS to some kind of varispeed control outputting from another device, then provide some detail as to all your device connections and give some general idea as to what you're trying to do and someone here can help. It is not clear what is meant by "I run thru my MPC 2000" or by "when I record them alone" Please also describe what exactly you're hearing that you believe you should not be hearing.
