Waves Renaissance Compressor used to be my "go to" compressor on PARIS/Mac.

Problem with OS9 and free plugs is the number of great free plugs that had been written by the time OS9 was discontinued wasn't huge.

However:

Blockfish, part of the FishFilletts package, was released for OS9, and it's very good.

Not compressors, but if you haven't got this, you should:

SonicWORX
Studio/Powerbundle

This page may be handy:

and this too:

<http://mda.smartelectronix.com/>

Hope this helps...

I love Modern plugins. I love the Harmonic distortion they impart.
