>> 2 x ADAT modules \$200.00

2 x Midiman Digipatch units-\$200.00

1 Sony MU-R201 - \$200.00 (this is a cool piece and worth the \$\$ if you need
and outboard stereo reverb/multiFX box) If this doesn't sell at this price
it's going back in my rack.

Bundle with MEC, SCSI cable C-16 and IF2 (bottom panel of MEC is held on
with black gaffer's tape. It's very secure and not visible from front of
unit. Has all front and back plates)-\$125.00

1 x MEC with some missing front and back plates-IF2 port may not work,
everything else does for sure-\$50.00

Creamware A16U brand new 16 channel 24 bit (96k capable) AD/DA converter and external power supply. Still in warranty - about 2 months old) Has 2 x ADAT I/O and will work double wire as an 8 channel unit at higher sample rates. Very nice and warm sounding ADDA conversion. Also will work with ZLink connections on Pulsar cards-\$600.00 OBO (I'm taking a \$450.00 hit at this price). Also has WC in out. This would be a waycool outboard converter for Paris interfacing with a couple of ADAT modules.

2 x 15' SCSI cables for long cable runs from EDS cards to MECS-brand new and worked perfectly with my rig-\$2500.00 each

Brian T Paris DVD \$15.00

13 slot Magma chassis-This is the newer Pro tools branded model with the round SCSI cable instead of the flat one that is no longer being made. The front on/off switch is stuck to the "on" position so to turn if on off requires plugging/unplugging the unit from the back. Includes host cards and cable. AS IS for \$375.00. If I have to spend the time to fix it, I'll want more \$\$\$ for it. You DIY guys could easily order a switch from Magma and have a rockin 13 slotter, or just use it as it is now.

Colorgraphics Xentera AGP 4 head video card-\$125.00 comes with everything you need and is brand new, still in warranty through Colorgraphics.Hi DJ,

I'm interested in the MEC for 50\$ and the creamware A16U.
Could you send me your email?

Best regards,
Thomas
