Hey guys I have had this problem before but can't for the life of me remember how to resolve it.

I have a 3 EDS setup with 2 MEC's no ADAT cards all running on an AMD Athlon with XP. Subsystem is all right and the install is fine.

What is happening is if I hookup both MEC's then card C will not playback. If I disconnect MEC B and use only the Master MEC on card A all 3 EDS' playback no sweat. Hook up the 2nd MEC and no playback on card C only cards A & B.

Any thoughts?

Also anyone have the plugin latency chart I have heard of floating around?
