I'm looking for PARIS information and I can't seem to find the PARISwiki, anybody got an active link?

Heya Will - that's my bad. We changed the DNS and broke the links. I'm still looking for a fix for it.

Ok,

Quick question.... I just rebuilt my PARIS rig including new hard drives. I have a project loaded but it will not let me set my record path on the boot or audio drive. Can PARIS use NTFS drives for audio?

Any guess what my problem is?

It's easily been 10 years since I messed with a PARIS hard drive issue.

Hm, interesting - I have no idea if PARIS can talk to NTFS formatted drives. Manual's no help, it predates NTFS by years. Try pointing it at a FAT formatted drive and see if that works?

I just formatted the drive to FAT32 and it still will not let me set a record path.... argh!

I had forgotten these type of PARIS headaches, lol.

Any ideas?

I had to allow permissions.... it's working now.

So....

In 2016, what is better for a PARIS audio drive?

NTFS

FAT32 64 block format

Found this very cool app for an easy FAT32 format on Win 7.

<https://pendriveapps.com/format-fat32-larger-than-32gb/>

Maybe a sticky or link to it in the PARISwiki.

I've used NTFS with Paris for years.

Cheers,

Kim
