Hi. I haven't been following real close, but I think there was a thread or more about updating the Paris drivers to support the new multi-processors.

I tried to weed back a few pages and I see nothing about it. Has this been accomplished? I have moved on to a firewire studio with a new computer (Dual Core 2 CPU), but many of my years of recording is with Paris and I'd like to be able to pull them up if needed.
