I have 6 rough songs that i started in paris and when i switched to cubase I exported them to wave files or so I thought. Problem is the tracks don't line up. Can anyone do me a favor and take these 6 projects and just open them in paris and render them out so all the waves start at the same point in time to make it easy to import into cubase 4?

I can put the files on ftp if anyone can do this for me. This would be incredibly helpful.

Thanks very much

Seeing as this is a not- frequently-heard request, I just created a page for PARIS transfer facilities on the Wiki for their benefit - and for those PARIS users who'd like a little free advertising. So anyone who's thinking

of responding to this not-infrequently-heard request and who might welcome the occasional transfer project might want to consider putting their contact information on this page:

<http://www.kerrygalloway.com/WikiPARIS/wikka.php?wakka=Paris ExportFacilities>

As always, if you're logged in on the Wiki, double click to enter the page editing screen, hit "preview" to see what your work looks like and hit "store" when you're done. No endorsements are implied by inclusion on this page and any fees are up to you to negotiate.

- Kerry

I'm just starting rhythm tracks on two separate CD projects, and preparing our house for sale. But if you still need this done in 2-3 weeks, let me know, and I can prolly help you.

Hey John, Dale here....I bought a C16 from you, my brother used to be your landlord--unless I got my "john"s mixed up (hmmmmm..... maybe I should rephrase that)

I'm on a mac, and I've only got one EDS card, so if those are not limiting factors, I'd be willing to try a song and see if I can get it to work for you. You may have to guide me thru the procedure though.

email me or post here

dale
