Hi All,

I'm looking for some spare parts:

- EDS-1000
- 8 in
- 8 out
- C-16

Working, in good to excellent condition. Strongly prefer US location.

Thanks,

Rich

Rich,
I've just recently decided (sadly) to sell all my PARIS gear and saw your post...I have those items, in excellent condition, and am in the states.

I haven't pulled cards, shot pictures, or priced anything yet...need a week or two to pull it all together. If still in need, we can get together then!?

I will need to get the going/fair market price for the items as part of the decision to sell is a need for cash. Ship lower 48, PayPal.

Original owner of the Bundle 3, very little use over the years, packed away for 12 years, revived with Mike's driver about two years ago...all working. Have many of the boxes but not all.

I will have available:

- 1 MEC
- 2 Analog input cards
- 1 Analog output card
(prefer I/O goes with MEC)
- 2 C-16's
- 2 EDS-1000 cards
- 1 Interface 2

All the above are black.

Thanks!
Gary

Hey Gary,

Sorry to see you go. Let me know whenever you're ready. Definitely interested in the in, out, and EDS cards. Interested in the C-16 if all the buttons and controls work, nothing sticks, no rust, etc. We can talk about the MEC. No interest in the Interface 442.

Definitely check the board here for pricing.

Thanks,

Rich

I will post a separate post as well but if you are interested I have a few extra pieces laying around that I would be willing to let go of.

1 MEC

1 C16

2 EDS Cards

1 input card

2 ADAT cards

1 Magma 13 PCI expansion chasis with cable and both cards but no PSU as I took it out for another build.

If interested you can also call or text me

Been a user and around the forums since 1999.
