Hi Everyone,

I just thought I'd post an update so that you don't think I've forgotten about you.

The crazy snow has been good for PARIS development. I've coded a back and and a ui for the class a amp from the dp4+/dp-pro. Unfortunately, there must be differences in the way memory is handled between the two platforms, because it disables most other plugins as soon as it loads (and it doesn't work, either).

I had to sort out how PARIS references tables compared to the DP/Pro, which I figured out last night. I thought that would fix the plug, but it didn't. There must be something else.

Anyway, I'm working on it. I'm sure that what I learn from this effort will make the rest of the dp/pro ports that much easier.

Hope you're all doing well.

Mike
