Hi All,

I've posted a couple of demos of the recent plates.

The vocal plate is here on a flute:

[www.ensoniq.ca/flute.mp3](http://www.ensoniq.ca/flute.mp3)

The drum plate is here:

[www.ensoniq.ca/drumplatedemo.mp3](http://www.ensoniq.ca/drumplatedemo.mp3)

Both are 320 kilobit stereo mp3 files. The drum demo has the same section recorded again at the end, only dry.

Cheers!

Mike

Hey Mike, I'm listening to the drums on computer speakers, what is the intermittent hum/noise? Is it just me? Was it something intentional?

Hi James,

You have a good ear! There is a bit of bleed from the guitar amp in the next room. I can barely hear it on my NS10s.

Is this what you are hearing, or are you picking up a 60 cycle hum kind of thing?

All the best,

Mike

I'm not sure, it sounds almost intentional, almost like a techno kind of  
a thing. It's almost like a demo plugin that intentionally has a intermittent  
noise. Maybe others can chime in.

It could also be cymbal or mic stand vibration??? Who played the drums?  
Reminds me of me; )

It's in time with the kit, so I'm going to say bleed through off an amp..  
most likely exactly what Mike said since it's not a 'deep' sound like a bass  
amp would make. The resonance is of higher origin to my ears.

It was a young guy named Adam. I wish I knew what you were hearing. It sounds fine to me. Of course, I'll be quite embarrassed if I've missed it. Maybe I should download the file from the webserver. Maybe something happened when I uploaded it.

Weird.
