OY! It's not BROWN! And it's not two tone! And it hasn't got any woodgrain!  
(Well actually it does, but only inside on the dash)... ...and it doesn't  
have Chevy Chase driving it...

And it... oh never mind... FINE! Say it's the car from Lampoons then...

....see if I care as I rumble down the freeway...

....burbleburbleburbleburbleburbleburbleburburburburburbu  
rbleburbledurbleburbleburburble...

;o)

Cheers,  
Kim.

You need to pimp that ride and strap some rims on that thang, my man!!!

Congrats on the job and the new sled.

;O)

compared to what some of here drove as youngins, that is new. nice ride. it's almost something like i drove as a punk teen except mine was steel blue, a sedan and had 400hp but other than that almost identical.

It's an HZ Holden Premier... Holden being the Australian branch of GM. 1979 model. Australian designed and built, though clearly with some American flavours. She's got a little 253 V8 in it...

I gotta run. More later.:o)

Cheers,  
Kim.

I hadda a '78 Nova with a 262-V8 in it... I tried to kill it, seriously I did. I used to ram the RPM's up to about 7~8 thousand and try to launch some pistons. Worst I could do was float all the lifters in it. Couldn't kill it man..... So, I promptly yanked, spanked and replaced with a 400HP 350 with a modified Turbo 350 tranny... barking tires hitting 2nd at any speed was not optional :)

I could launch the tires hitting 2nd gear if I wanted to, LOL... Any chance you'll be wasting your life at the gas pump like I did?

"Aaron Allen" <nospam@not\_here.dude> wrote:  
> Any chance  
>you'll be wasting your life at the gas pump like I did?

So far I've only filled her once, and have used around half what I put in.  
Seeing I haven't had to refill I can't be sure of any quirks in the gauge  
etc... (for example, on full it reads only about 7/8 full) so I'm not sure  
what milage I'm getting yet. I am suspicious it's using a bit though. ;o)  
I've been about 100 miles and used about half a tank (and the tank cost \$80!).

Fortunately I'll be taking public transport to work at the new job, so the  
car is just for weekends.

But it doesn't have a monster engine. The 253 (4.2 litre) V8 is a great engine

though, and they can be made to go pretty quick if you want. This one has already been rebuilt just 24,000 miles ago, with hardened heads suitable for unleaded, new pistons etc, so I'm thinking I'll just cruise around and leave it as is. These engines can go for 300,000+ miles, so if I treat it nice, she'll last me two decades...

If fuel costs get the better of me I can convert it to LPG. LPG here is roughly 1/3 the price of normal fuel... (LPG is about \$1.70 Australian a gallon - normal unleaded fuel is over \$5 a gallon).

The main thing is that it makes the right burble sound as it drives down the road. ;o)

Cheers,  
Kim.

Rock on man.. I remember my old 262 sounded pretty good, it just didn't get me the insane umpph I wanted as a heavy footed 16 year old. These days that would be getting 'real' expensive though as petro is no longer 65 cents a gallon.

Ahh.. the good old days when you could run dead dinosaurs through your motor, and in a pinch, some Everclear.

I do actually know the phrase "pimp that ride" as we did have the U.S. show  
"Pimp my ride" or something screening here for a bit.

It actually already has some relatively new and somewhat classic looking  
steel rims on the thing which aren't original but which I'm somewhat happy  
with. And I've just installed the sheepskin seat covers in the front. ;o)

Just finished cleaning the interior last night and it's come up a treat.  
The interior is all red to match the paint, not drab grey like most new cars.  
She still needs some new carpet though.

And why is it nothing is ever simple? I tried to screw on a new handle on  
to the T-Bar and the screw fell to the floor. Think I can find it?!?!? Plus  
the T-Bar I bought has a fault with the plastic moulding and wont go on...

....now I'll have to return it...

Shees... ;o)

Cheers,  
Kim.

My first car was actually this same model. It was only ten years old when I bought it though. ;o) And the last one was a 202c.i. 6 cylinder... nowhere near powerful enough... some 20 seconds 0-60 m/h... and a 3 speed manual! Yep, three whole manual gears!! ;o) Rip through first (which took you to about 15m/h on the original engine if you were lucky), then into second, which took you to about 40 mile. If you were at 60 miles and needed to accelerate you just had to press harder with your foot and wait for the little 202 to wind up.

The last one was a "Kingswood" also, not a "Premier" like this new one. Premier being the more expensive luxury model with A/C, a clock, and usually cloth seats etc... as opposed to my poor old vinyl seats in the Kingswood which were quickly covered all round in sheepskin.

I spent about 10 years in that car wishing I had a V8... now FINALLY... ;o)

Just had a look and the carby on this is awefully small... hmm... ;o)

Cheers,  
Kim.

Hmm...pimp your ride...

Y'know, it would only take a few hundred dollars to turn your car into  
this:

Now here's your chance - go to the nearest carpet store & get some 70's avocado green shag remnants from a house they just installed some new stuff in.

:)

pop a duel quad or a six pack on it and watch the fuel gauge move as fast as the speedo...in opposite directions of course.

It's got a little baby two barrel stromberg WW carby on it at the moment...  
an upgrade may be in the wings. My infamous brother has a Holly 4 barrel  
sitting somewhere doing nothing, which would make it go, though I may wait  
until I get the LPG conversion so the fuel price is not so high... ;o)

Holley used to make a series called the economaster that worked well.... you might check into that. Gotta be careful about what size carb you stuff on there, you could choke out that little v8 pretty easy I'd bet. The other thing I found about Holley carbs.... if you backfire, put in a new valve (located under the bowl) because 9 times out of 10 you will have just blown it to shreds.

hehehe... Yup! :-)

2 Challengers (70/72), 1 Cuda (71) and 2 Chargers (69/72)... over the course of about 8 years... I was hard on vehicles back then. ;-) My mother drove a 67 Cuda from new till it died of terminal cancer in the mid 90's (the car, not mom... she's still kicking)

David.

Whew, I thought it might have been the car. Other things to look out for include an unrestrained infant rolling around in the back as you drive a gazillion miles per hour through the outback.
