Are there any issues running analogX's sampleslide with PARIS 3.0 on XP?

Anything I need to know about the install or is the Vonengo one maybe a better choice.

I'm running no other DX plug-ins (or VST now that I think about it)

Thanks!

Craig

Sampleslide works great in XP Craig. In fact anything that I've tried in ME seems fine in XP.

Hey guys, not to worry.

I understand that she was "baby syncing" and eventually the bump will fade
out live on Saturday Night.

;)
