Well, I'm back to the fray and will not ditch Paris. Awfully glad this NG still exists. So, some questions: Will cloning your system drive lose the Paris reg/ilok or whatever the hell it is? Also, I've got a two card set up with a MEC and want to add my old Interface 442. Do they have to be clocked to each other? I'm also looking for a friendly tech to help me work out a patch bay/routing scenario (I'm near Hollywood and this is not a request for a freebee). Oh, and are there any LA (or greater LA) folks mixing professionally on Paris these days?

Guess that'll do it for the time being. Thanks very much in advance.

All the best, Jim

My personal experience only, but when I've used Ghost to clone my system drive, Paris registration has been fine.

Thanks, Scott. I'll give it a go with Acronis True Image.

Hi Jim,

Nice to see you back.

David.

BTW, David, are you still doing any "final" mixing in Paris in order to impart that special flavor? I don't know what kind of material you usually do which would probably affect your decision making in that department. And are you in the bay area?

To be quite honest, I'm no pro mixer and need one for a documentary I'm scoring. Ordinarily I would and could do it myself and be just fine. However, I want to take this to a different level for "my reel". Do you know of anyone around here, or there, that's Paris savvy and really good? What about you?

Hope this post isn't inappropriate for where the NG is at these days.

Thanks, Jim

Oh, I just checked your web site and you're in Calgary. Nice spot but not exactly around the corner from me. Sorry.

Regards, Jim

:-) unless it's a really big corner!

We have a bit of a DJ-esque set-up here. I am currently tracking to Nuendo (and soon PTHD) and using Paris as stem summing for 44/48 sessions. Any of the 96K stuff is mixed in the respective program (not that I have actually done any 96K stuff yet). I fond that summing in Paris helps glue the mix together. Once we get HD in the fray things may change somewhat.

David.

Ha... no kidding.

I've got to make a change, from Logic 5.5 (pc), to something else. Am
leaning towards Nuendo and would be
doing the same thing as you in Paris. Has Nuendo been relatively
painless? If I do jump it won't be until Nuendo 4
comes out and the early adopters have done their fair share of the
"beta" testing. Good luck with PTHD.

Curious man... why wouldn't you still use Paris to glue using A/D/A and the Paris bus as a master insert plug on a 96k rig?

I am actually really digging N3... if it weren't for our clients walking away because we don't have PT, I would stay with Nuendo.

David.

Well... we do have 32 analog ins on Paris... so I could
still sum the stems that way! :-) If it ever comes up I'll

give it a go.

David.

Good to hear.

Bad to hear clients continue to fall for the digi thing. Awfully glad I don't have to deal with that. Never the less, I hope the switch does well by you.

Jim

Hey Jim,

Not switching, just adding more options. Paris isn't going anywhere...

David.
