
Subject: Just met a sorta' smart guy.....

Posted by [Deej \[1\]](#) on Mon, 18 Sep 2006 07:12:07 GMT

[View Forum Message](#) <> [Reply to Message](#)

He wrote the software program that MRI machines are using these days. Very interesting guy. I'm mastering a project for his wife. He was pretty interested in the Paris program. His wife is pretty well known in the LA music community and he digs this stuff. I may ask him if he could write a delay compensation applet for Paris. He really got a chuckle out of Frankencomp.....said he's built a few similar monstrosities himself. They will be back over here tomorrow night.

;o)

If the price was reasonable I think our little community would pony up the necessary funds...I know I would

I was taking that for granted, since we all pulled together to help fund Chuck's efforts. I have no problems paying for upgrades that are delivered.

Well.....if I get something going with this, I'll let you know. I'm not =
 sure exactly what happened with the AES thing at this point. All I can =
 say is that the intent was certainly there and sincere on everyone's =
 part, but for reasons that are still unknown to me, this has been put on =
 hold indefinitely. I guess I'll take responsibility for the =
 disappointment though and I'm really sorry that things are still in =
 limbo regarding this.

I would pay (nearly) any amount of money for the following capabilities:
1. Delay compensation on inserts and auxes.
2. Ability to use VSTs on aux busses.

This would keep me using Paris as my primary app for a LONG time.

Hey guys, there is another alternative :-)

Just buy up a bunch of IF2's and mod them.

Chuck

Whilst we are on the subject of modification, I have often pondered the feasibility of tapping into those EDS interconnect ribbon cables and, with the aid of some additional d-a/a-d conversion, set up a hard-wired submix insert. *Someone* out there must know enough about the Paris architecture to know whether or not this is possible. OK, I'll just go back to dreaming now...

Great idea Chuck about the IF2 - use what's aval! If anyone needs an IF2
to experement with let me know...

We've gotta' have the source code. Anybody seen this lying around?
;o)

Dj, I know it's probably been said, but I think everyon here would donate some cake for a few fixes. ADC being one, and VST on Auxes being another for sure (I know that one may be impossible) ANYhoo, good luck!

Have you got the source code? He's got every toolkit on earth available, but he's gotta have the source code.

Hmm, we'll need to travel to Paris to the Louvre and stare at The Last Supper for secret clues then where some sort of chain device around our legs for a few weeks.

Is there any way to crack the code?

Would this be legal at this point?
Certainly someone has the capability.
