So what's up with this? I'm currently using the following Lexi PCM-91,
Roland R-880, Quantec Yardstick, Sony V-77 and have invested quite a bit in
integrating them into my rig. I like 'em or I wouldn't have done it. Will
Altiverb compare to/surpass my hardware units?What's the damage CPU-wise?
Efficient??.......hog'esque??? Would 3 or 4 different instances cause CPU
death?

will I die if I don't have it?

Tell me baby.....tell me now........I gotta' know for sure.........

;o)
