Hi All,

This is still a debug edition, but I have removed a lot of the debug code and tightened up the timeouts so that it loads quicker and uses a lot less CPU while running.

I would be very grateful to anyone who tries this out on any PC. I haven't managed to make PARIS run on a multi-CPU machine reliably, but I cleaned up a lot of code, and this edition runs on my Phenom 9350 as long as the intaffnity and toms hardware utilities are used to force the driver and the app to cpu 4. The original XP release did not work on my Phenom no matter what, so this is still a very important update for me. :)

I'm going to shift gears to the Mac plugs as soon as I can get the rest of the debug code out. Please let me know if you have any trouble before then.:)

Cheers!

Mike

Subject: Re: PSCL update

Posted by [kerryg](#) on Tue, 26 Aug 2008 04:53:34 GMT

[View Forum Message](#) <> [Reply to Message](#)

Great Mike - I've downloaded and installed it, and so far so good. I've got a strange problem with my C16's jog/shuttle wheel in "edit object" mode, but that problem predated the installation of this latest PSCL.

- Kerry
