
Subject: Win98 users, have a question
Posted by [AA](#) on Tue, 25 Sep 2007 14:35:39 GMT
[View Forum Message](#) <> [Reply to Message](#)

I'm trying to get an old 98 box to see a USB stick for data transfer for a friend.... my 4 GB USB stick is a no worky. Is there a known document/limitation to using USB sticks in 98 w/o loading wierd drivers?

You need win98SE for that.
There are generic drivers on the web.

98se it is... but it doesn't even come up and see a new device upon insertion, which I was surprised by.
All 98se drivers are generic?
Any size limitations that you are aware of ?
Thanks D !

Well I've tried to upload nusb30 driver but the file is too big and won't post. I can email it to you if you want.

Its about 750K.

That should work. I've used several types of thumb drives
and that driver works with all I've tried.

Isn't it cool when something works and its free?

It makes you look upon the world in a different way.
