If this is the BT DVD referred to on the Paris site, I would love to have  
one as well. Details?  
Thanks, Edna

Yeh I have a Fluke meter in the car. Next time it's doing it a lot I'll check

it out.

Cheers,

Kim.I'll check that out. There is a serial port. I'm not sure where the disk is that came with it though, which could be an issue, as there seems to be limited support for this model on the net.

I'm suspicious it's not the UPS actually kicking in, but some other protection. At the old place the UPS would kick in for about a second every now and again (like once a month) and would always beep, as it does during a proper outage, even though the power still appeared ok in the house. Either way I'll check whether anything can be done with the serial port.

Cheers,

Kim.
