Hi guys,

I still have most of my rig to sell, all blue face, all in good condition:

EDS1000

C16

MEC

ADAT x 2

8 IN x 2

I also have the P4 1.6 I've been running it on if it's of interest to anyone. I'd like to sell as a package if possible (with or without computer). Pics are available.

I'm in the UK, so shipping will need to be taken into account, but with the £ crashing against the € and \$ it's probably not a bad time for selling / buying!

PM or reply here with offers,

thanks

Kerr

bump!

still got the bits.....nobody interested in making an offer?

thanks

Kerr

I'll pass the word around to some of my NONE Paris using friends. There has been some interest lately in this area.

thanks John, much appreciated.

I don't mind selling as a whole, or splitting, and I'll be kind on postage too!

cheers

Kerr

Hi Kerr,

I just read your message you posted back in April...we were all much younger then!!!

I don't know if you still have any of that Paris stuff, I was looking around trying to find an input card for my MEC.

I rarely touch Paris I only use it occasionally for location recording.

I have to say it, that dinosaur sounds good...eh eh

All the best

Hi,
Any trade considered for input cards ?
I have a AT4033 Audio Technica mic
Yamaha MU50
Akai SG-01v
Regards,
Dimitrios

Hi Kavide, check your pm box.

Hi Dimitrios,

what's the AT4033 you've got? I might be interetested in that. Is it the recent model or the older one? Were you thinking straight swap or cash involved?

thanks

Kerr

Kerr,

Are the ADAT cards & Input cards still available? would you be willing to ship to the states?

Let me know if you are interested.

bradleywreed@mac.com

Thanks.

-Bradley

Hi!

I'm from Finland and i'm interested in to know, what's the price of the whole Paris system, ...how much you ask?

Hi,

Some of the rig has sold now, I have left:

2 x ADAT cards
8 input card
EDS1000

I'd thought about €500 for everything (including postage, insurance, etc, but I will take offers or am happy to split if you only need certain pieces

thanks

Kerr
