hey, DJ- Howdy!!

this has nothing to do with your question (of course!)--

just a thought. I don't know how much I've told you about this - my memory
is harder to upgrade than these computers' -- but here's my personal plan.

Macs for internet = no viruses, no adware, no nuthin' (at least as far as
I can tell, and compared to the XP machines on the internet that I know of.)

XP machine for heavy duty work stuff -(with considerable overlap - I transfer
stuff between machines manually with a travel drive all the time) but never
let the XP machine onto the internet. Never. XP machine I put together last
year is still running flawlessly.

The iMac I'm using right now came, like most of my computers, used - G3, piles of ram, OS9 a

nd OSX, newer versions of most of the programs I use -
for \$220 last January. I think it's crashed twice in 12 months. Does the
iTunes thing. I spend most of my time on this toy -- plus I can even toss
it in the car and drag it to places like the world's heaviest laptop.

I tell everyone who's just getting into the internet to grab an old iMac
and go.

Ok, steve out....!Thanks, I will. Well, all was not lost as I had thought. I started a new
project using the same name and my recorded tracks appeared, only the
project was lost. 8:)

<http://www.apple.com/powermac/>

To really compare ummm Apples and oranges...

sorry, bad pun...

DCHi Jamie,

I appologize if I offended you. I certainly didn't mean to. I used to love the mac back in th day, and despite the layers of bandaids below the surface, the elegance of having extentions, control pannels, and preference files made for a beautiful system.

No, it didn't have pre-emptive multitasking or protected memory, but those things can just get in the way of timing sensitive multimedia processes anyway. I know that Windows XP sucks compared to Windows 3.1 for midi timing, and it's because of the "fea

>It sounds like I should read up on core audio. Too bad our beloved PARIS
won't be able to take advantage of it. Windows XP completely sucks for MIDI
timing as soon as a few DX plugins are thrown into the mix. I haven't tested
this since getting a dual Athlon setup, so maybe it will do better with extra
CPUs. Most of my software doesn't, though. Who knows.

I'm using fewer and fewer plugins all the time. I caught myself wishing

I could run PARIS in windows 3.1 earlier. :) Maybe I should try it in an old mac running os 9.

Take care,

Mike

>Hi all,

Just a heads up for us remaining Mac fans.

Avoid Firefox 1.5 for OSX. (it's the current release)

It's pretty buggy. The worst issue is it's refusing to quit out and
keeping the computer from shutting down.

I went back to 1.0.4 and everything is fine again.

Dimitrios,
>I have a major problem with this cause some of the tracks of submix =
1` cannot
>be rendered neither with no native plugins...

Is this because you are flying them in from another program? I'd =
record them in Paris if this
is the case. Then apply stereo plugs (native) to tracks. Rendering =
is not needed.

>Is there any tip using the digital spdif in out to have all in time =
and alligned?

Just the BT loop technique. You'll need to use sampleslide or =
equivilent to time
align.
>I have read that spdif out-in is 1 sample latent.

Yes 1 ms.

The problem is that I have to record via spdif via actual levels and =
then

when I import should leave them at 0 point level, right ? =20

As long as levels are right I'd just leave them.

or do it the other way around ?

I don't understand exactly what you are saying here. =20

1.0.4 seems to still work great. We are getting a multiple license
for the latest OSX soon and then I'll try updating to 1.5

I bet that will clear it up.

thanks

DCSorry Doug, I want you to stay alive,-) so I can't lie for you. It's using
AMI bios but it seems to be much better working in theses days than it has
been earlier. Really easy to overclock too.

Thanks. Yes I have a P4, but have HT off. The error message does have =
"cache: 460. . . " in it.(?)

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:4393cad7@linux...

Edna,

By chance are you using a P4 chip? If so make sure

Hyperthreading is turned off in your BIOS. That can really=20
ruin a nice day in Paris.

Tom

oing a lot of fxs and adjustments of fx =
during playback?? =20

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:4394716f@linux...

Edna,

I really don't have any better answer for you. Control S is your =
friend though.

Maybe you found another Paris bug? Like grabbing too many tracks in =
the=20

editor and changing their lengths together? That one gets me once =
in a while.

Lesson is Control S, Cut all tracks needing editing to the exact =
same length,

Control S, then do the edit, then control S.

I wish I could be of more help. Maybe you do have an issue with =
Paris and your computer.

My assertion failures usually have something related to .dll in =
their title.

Tom

"Edna" <edna@texomaonline.com> wrote in message =
news:43944a50@linux...

Thanks. Yes I have a P4, but have HT off. The error message does =
have "cache: 460. . ." in it.(?)

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:4393cad7@linux...

Edna,

By chance are you using a P4 chip? If so make sure
Hyperthreading is turned off in your BIOS. That can really=20
ruin a nice day in Paris.

Tom

"Edna" <edna@texomaonline.com> wrote in message =
news:4392fb60@linux...

Hi Cujo,

Unfortunately, I was not able to save it. Paris would not let =
me do

anything at all until I responded to the error window and then =
it was all

gone! I tried to pull up the project window or do anything =
but it was a
hard freeze.

Since I only had a single submix going and was only using a =
couple effects

in the aux module on one channel, I was surprised to get this =
error. I have

a gig of memory and a fast processor as well. I am using XP =
pro with SP1

though.

Thanks,

E

Yo Cron, whazzup?

NeilHi Edna,

Have you installed the "PC Freebies" effects? If so, that might be contributing to your problem. They are buggy with XP. Also, if you haven't already, try reinstalling the effects subsystem.

Paul

I've been wondering if this D2B might be the magic bullet for putting a native system on the same sonic footing as Paris. I may have just picked up a pretty big client with ongoing work involving composing original music for video. This clients sells *lots* of videos so it's got the makings of being one of those situations that I've been hoping for with steady work. I just got the call about this last night. I'm glad I haven't yet ordered the parts for the new computer. I may be needing to upgrade to Nuendo and to build something with a bit more horsepower if this becomes a reality. You definatly need to use waves to go to protools on a mac.

>DJ,

What I would suggest is pick a used Creamware card that uses 32 bit integer (not floating) bussing has 64 mixing busses as ASIO so you can use your Nuendo and mix on Pulsar great digital consoles that rely on dsp and not on cpu.

Great clearance.

I bought one for 400\$, now I have three Pulsars.

One of these days I will describe you my system , Paris, three Pulsars and cubase.

Regards,
Dimitrios

SX/nuendo?

the apogee site says to terminate with a T and a terminator at the input,
when the device recieving WC has only In and Out.

Does this method work with Paris??

Paris LOOKS happy too. Both Mecs set to "Word". Optical lock lights are on for all adat modules.

everything looks good on 9652 also... green word clock light is on and everything reads correctly on the settings panel... everything is synced... clock mode is set to word clock and sync ref says Word.

problem... i don't get any audio from 9652 adat 9-24. 9-24 is connecting to Mec #2(submix 2) modules. when i put a file in submix 2 i hear it... but in live mode i hear nothing from nuendo. everything is fine on adat 1-8 connected to Mec 1 (submix 1).

i am at 44.1

any suggestions?

Jeremy

Paris on 98se.

2 Mecs 3 cards.
Mec 1 has 8in, 8out, 1 adat.
Mec 2 has 2 adat.

Nuendo 3 and Sx 3 on XP.
1 Digi 9652

Big ben is sending wordclock to digi9652 and both mecs... 3 apogee cables going from 3 outs on ben to each input... terminating with a T and 75ohm wordclock terminator at the input of all.

like i said... everything looks good on RME DIGI Settings... clock mode is set to word clock, sync ref says word, all adats say sync, spdif in is dead set on 44.1 and not moving.

i turned off both mecs and still no go.

i am gonna try to re-connect the adat cables and the word cable to mec2.

its like the adat modules in mec 2 aren't even there... i can't get audio in
or out of them.

but the digi settings say "sync".

i don't get it. 44k or 48k doesn't matter.

HEY!!!! isn't there something you have to put in the cfg file to make
external clock work right????? maybe that's it!!!!

now if i could just search this newsgroup that would be great!! anybody out
there know what to put in the cfg file??

housesync=1

???

don't need it.

Loop out of the first MEC to the second, do not route
directly to the second MEC from the Big Ben. Ignore
termination for now.

Make sure that the adat modules are selected in the patchbay.

David.

Kim.</BLOCKQUOTE></BODY ></HTML>

-----=_NextPart_000_0189_01C5FB2C.13CF9070--In about a week, I will have completed buying (everything) I think I need for a real project studio.

I have:

Paris 442 + IF2 w/ C16

Mackie 14ch board

Electric Guitars

Acoustic Guitars

Bass Guitar

Guitar Port

Korg N5ex

Drum Soundfont

Cakewalk Sonar

AT4033 Condenser Mic

Isolation Booth (for vocals, acoustics)

Various audio programs (Soundforge, CD Arch)

A slow Pent IV that has seemed to be fast enough to work with all of this

and will soon have:

A nice set of reference monitors.

My question is, I consider myself more of an artist than a producer, however....what else do I need???

My current system is:

1. I program the drums in Sonar using my drum soundfont I like....
2. I add any keyboard tracks in sonar...(piano, organ)
3. With three clicks at the beginning, I import and line up those tracks one at a time into Paris
4. Usually just record the Bass Guitar direct to Paris
5. I add my Guitar tracks with Guitar Port
6. I record my live tracks in the Iso booth (C16 with long cable is handy here)
7. I mix down in Paris using mostly the included effects
8. I render out and master in Soundforge
9. I burn CD in CD Architect

And hopefully, with the new reference speakers, the CDs will sound good.

However, when I read the posts on here, I hardly know what a lot of the equipment I hear talked about even is.

What I need to know is, is there an area in my studio or process that is missing that could take me to the next level?

If you inherited this studio, what would you add/change to it?

I know some of it is based on music styles/personal preferences, however, is there something here that I am obviously overlooking?

Thank you for taking the time to read and respond!

Greg BrattonGet all Behringer equipment. Then you will never have to worry about anything working ;-) I would pick the Allen and Heath 16:2 mixwizard over the Mackie. Also, I would run win98. Also, check out the Studio Projects mics. C1 and C3 WOW.

John

ht". It's the first mix that
I've done in Paris that was commercially released. Everything else I've
done to date has been mixed on a console. Pray for me over the holidays...
I'm going to try to migrate one of my rigs to XP.

CLFantastic! Congratulations Chris.

DC

>Me too... about 2 months ago!! Just bought the RME HDSP 9652 and sold my Dakota/Sierra
combo.. oh well. Good on you Kim!

Gave up on the Mackie Tracktion experiment too by the way. Nice little program
but it syncs to nothing consistently.

I'm going with Cubase SX3 on a Gigabyte K8NS 939 Ultra with an Athlon 64
3200 for my second rig. Thanks again for your help previously, Deej. As I
venture bravely into the two DAW approach you and others here are using,
I'm sure I'll have more questions.

Cheers,

jj

I do love that saying. ;o)Not sure what Sp 1 is? Is this the version # where would I find this? I haven't

tweaked the system since reinstalling XP but I had on the previous install.I think that I will pick up another harddrive and take my 2 audio drives out. DO you think that there will be any problems when I put the fat32 drives in and copy everything over to the main audio drive?

>>>Some thoughts below:Hey Greg,

A couple of thoughts to add to list:

-I'd check out this site:

<http://www.analogx.com/contents/download/audio.htm>

AnalogX has written some cool programs and some especially for Paris. The
Paris Auto Add utility might come in handy as it allows you to batch process
(convert) wave files to Paris audio files.

-Also, you might consider mastering your projects right inside of Paris,
instead of going over to Sound Forge.

Cheers,

MR

of The Cream Live Oct 1968,Chastain Park,Atlanta

Ga..I was 15..My friend, who owned a music store, knew the sound man,and he let us set up 2 mics and tape it in stereo,at the board position...They did basically the same songs back then,as on the RAH DVD..I assume they also taped the MSG concerts in Oct....The new DVD sounds nothing like the "old Cream"...I totally liked Clapton when he played his Gibson SG (as he did on Live at the Fillmore)..his Strat tones are not nearly as "psychedelic"..and of course the Drums and Bass also sound much cleaner now....Bruce's new version of "Train Time" was just awesome...

"DC" <dc@spamthegrammys.com> wrote in message news:43989adb\$1@linux...

>Dear DJ,

Ebay has an ADA_8000 Behringer you were looking for.

[http://cgi.ebay.com/Behringer-ADA-8000-AD-DA-8-channel-conve](http://cgi.ebay.com/Behringer-ADA-8000-AD-DA-8-channel-converter_W0QQitemZ7373642683QQcategoryZ23790QQssPageNameZWDVWQQrdZ1QQcmdZViewItemThanks)

[rter_W0QQitemZ7373642683QQcategoryZ23790QQssPageNameZWDVWQQr](http://cgi.ebay.com/Behringer-ADA-8000-AD-DA-8-channel-converter_W0QQitemZ7373642683QQcategoryZ23790QQssPageNameZWDVWQQrdZ1QQcmdZViewItemThanks)

[dZ1QQcmdZViewItemThanks](http://cgi.ebay.com/Behringer-ADA-8000-AD-DA-8-channel-converter_W0QQitemZ7373642683QQcategoryZ23790QQssPageNameZWDVWQQrdZ1QQcmdZViewItemThanks) Dimitrios. I was looking for an Ultramatch Pro SRC 2496 though.

Appreciated ;o)
