Yup. It's free but you have to validate windows. I've been using it at work for over a year, haven't seen any problems with it other than not liking the way it updates. It comes as part of Vista, though I'm not positive if it's *all* flavors of Vista yet or not.

Antivirus?=20
Use <http://free.grisoft.com/doc/5390/lng/us/tpl/v5#avg-anti-virus-free>

It's always worked perfectly for me, so I have no reason to switch my machines off from it.=20
