DJ,

Listen I know you love messing with this stuff, but I think we need to focus on how to get the mixes we want out of an all native system.

It just doesn't make any sense to me to get onboard with another weird, proprietary dsp system. Creamware is as weird, oddball nad proprietary as it gets. Why bother with it? Why bother with UAD or anything else. It just doesn't make sense to me.

If we can't get decent mixes out of a native daw then something is wrong. Let's find the thing that's wrong, and make it right.

Chuck
