I purchase a pair of Neumann KM84i's on EBay. Seller uses the following = language in his ad.....

It is in very good working condition it is missing the purple neumann = shield on the microphone it has some minor ware and tare a few light = scratches on it as well over all i would give it an 8 out of 10=20
I plugged it in with Phantom power it works and sounds great=20

i will offer a refund only if microphone is damaged during shipping=20

Shipping insurance is recomended=20

this item will be sold as is and will not arrive D.O.A.

Seller offers to hship them to me for \$10.00. I tell him no, and provide = him with my UPS account number and tell him to ship them 2nd day, = insured for \$3000.00, which he does. For some reason, they arrive late, = (the evening of June 28th) but the package is completely intact and = shows no signs of damage or mishandling.

I put them up on stands and connct them to my Great river preamp. the = output of one if them is a bit low initially, but comes back up to an = acceptable level after a minute. I leave them up for about 45 minutes to = get a burn in and they appear to function normally.

The next day I do the same. Output level of same mic is a bit low, but = stabilizes. I use them for a little while, then put them away. I leave = the seller positive feedback because I am willing to concede that an = old mic like this may need to get the circuitry warmed up in order to = stabilize.

Sunday, July 2nd, I have a picker come over to do some tracking. I put =

the mics up and start tracking. The same mic that I thought needed to = stabilize drops in level to the point it is unusable, making quite a bit = of racket as it dies.

I call "a well known expert" (I'm keeping names out of this) on Monday = and under his guidance, I remove the capsule of the mic that died. then = I remove the capsule of the mic that works. the connecting pin from the = capsule assembly to the amp of the bad mic is physically broken off in = the back of the capsule assembly. When the capsule is screwed on to the = amp, there is barely enough current flowing between the broken pin = pieces to provide some signal, though not enough to be usable. I have = attached pictures.

At this point I called yet another well respected expert who services = these mics for an opinion and was told that he had a backlog until late = 2008 but that Neumann could probably fix this issue. I boxed up both = mics, called Neumann, talked to their tech support, got an RA# and = shipped the mics on Monday PM.

I then called PayPal and described the problem. They stated that their = policy is that no matter how a seller represents an item, if he accepts = Payment by PayPal, he is subject to the PP 45 day = complaint/arbitration/refund policy (I guess this may be why people who = sell very expensive old "vintage" mics, don't accept PayPal. The support = guy also advised me to go ahead and submit a complaint so that this = could be handled properly.

I thought about this and then e-mailed the seller through EBay with a = brief description of what had happened. I didn't hear back from him for = a few hours. I decided to file the complaint (the seller thinks a little = prematurely) because I'm extremely busy and don't have the time to jack = around with waiting for some dude who probably is going to tell me that = I bought these "as is:" so he's not going to do jack ****. Judging by = the language in his ad, he is obvious intent is to sell a used mic and = then deny responsibility for it's condition because "this item will be = sold as is and will not arrive D.O.A" because " I plugged it in with = Phantom power it works and sounds great"

Since I paid for both mics at once, Paypal gave this a single = transaction # and has frozen the payment for both mics. I clearly told = him (when he replied to my complaint) and to PayPal (when I made the = complaint) that my problem was with only one of the mics. I will be fine = with releasing the funds to him for the working mic, but I have not yet = received a reply from him to my reply *to* his reply to my reply (sigh).

I have asked him to pay for the repair or give me a full refund for the = mic if the capsule is not repairable. I am also willing to abide by the = opinion of the folks at Neumann as to the condition of the mic. I think =

I have a reasonable expectation to have a functional mic and I think the seller's attempts to have it both ways by stating that the mic works, but "if it doesn't", anyone who buys it is screwed. IMO, a seller has to have responsibility to have his products serviced and confirmed to be in good working order, or be willing to abide by the rules of the game if he accepts Payment by PayPal. That's part of the beauty of PayPal. Seller gets his money immediately....buyer has recourse if he gets screwed on. Am I being an asshole here?

BTW, I tried the "good" capsule assembly with both mic amps and both =
amps are working properly. There is a tiny bit of the broking off =
threaded pin sticking out of the back of the capsule assmebly s maybe, =
with the tools available to the the mic techs at Neumann, they can get =
some purchase on this and unscrew it, replace the pin, reglue both pins =
to the respective capsule assemblies (as they should be) and we'll be =
done.....hopefully. these mics sound really good and I'm hoping upon =
hope that the capsule isn't damaged. they ain't making them anymore.

"DJ" <animix _ at _ animas _ dot _ net> wrote in message =
news:468bf398@linux...

I purchase a pair of Neumann KM84i's on EBay. Seller uses the =
following language in his ad.....

It is in very good working condition it is missing the purple neumann =
shield on the microphone it has some minor ware and tare a few light =
scratches on it as well over all i would give it an 8 out of 10=20

I plugged it in with Phantom power it works and sounds great=20

i will offer a refund only if microphone is damaged during shipping=20

Shipping insurance is recomended=20

this item will be sold as is and will not arrive D.O.A.

Seller offers to hship them to me for \$10.00. I tell him no, and =
provide him with my UPS account number and tell him to ship them 2nd =
day, insured for \$3000.00, which he does. For some reason, they arrive =
late, (the evening of June 28th) but the package is completely intact =
and shows no signs of damage or mishandling.

I put them up on stands and conncet them to my Great river preamp. the =
output of one if them is a bit low initially, but comes back up to an =
acceptable level after a minute. I leave them up for about 45 minutes to =
get a burn in and they appear to function normally.

The next day I do the same. Output level of same mic is a bit low, but = stabilizes. I use them for a little while, then put them away. I leave = the seller positive feedback because I am willing to concede that an = old mic like this may need to get the circuitry warmed up in order to = stabilize.

Sunday, July 2nd, I have a picker come over to do some tracking. I put = the mics up and start tracking. The same mic that I thought needed to = stabilize drops in level to the point it is unusable, making quite a bit = of racket as it dies.

I call "a well known expert" (I'm keeping names out of this) on Monday = and under his guidance, I remove the capsule of the mic that died. then = I remove the capsule of the mic that works. the connecting pin from the = capsule assembly to the amp of the bad mic is physically broken off in = the back of the capsule assembly. When the capsule is screwed on to the = amp, there is barely enough current flowing between the broken pin = pieces to provide some signal, though not enough to be usable. I have = attached pictures.

At this point I called yet another well respected expert who services = these mics for an opinion and was told that he had a backlog until late = 2008 but that Neumann could probably fix this issue. I boxed up both = mics, called Neumann, talked to their tech support, got an RA# and = shipped the mics on Monday PM.

I then called PayPal and described the problem. They stated that their = policy is that no matter how a seller represents an item, if he accepts = Payment by PayPal, he is subject to the PP 45 day = complaint/arbitration/refund policy (I guess this may be why people who = sell very expensive old "vintage" mics, don't accept PayPal. The support = guy also advised me to go ahead and submit a complaint so that this = could be handled properly.

I thought about this and then e-mailed the seller through EBay with a = brief description of what had happened. I didn't hear back from him for = a few hours. I decided to file the complaint (the seller thinks a little = prematurely) because I'm extremely busy and don't have the time to jack = around with waiting for some dude who probably is going to tell me that = I bought these "as is:" so he's not going to do jack ****. Judging by = the language in his ad, he is obvious intent is to sell a used mic and = then deny responsibility for it's condition because "this item will be = sold as is and will not arrive D.O.A" because " I plugged it in with = Phantom power it works and sounds great"

Since I paid for both mics at once, Paypal gave this a single = transaction # and has frozen the payment for both mics. I clearly told =

him (when he replied to my complaint) and to PayPal (when I made the complaint) that my problem was with only one of the mics. I will be fine with releasing the funds to him for the working mic, but I have not yet received a reply from him to my reply *to* his reply to my reply (sigh).

I have asked him to pay for the repair or give me a full refund for the mic if the capsule is not repairable. I am also willing to abide by the opinion of the folks at Neumann as to the condition of the mic. I think I have a reasonable expectation to have a functional mic and I think the seller's attempts to have it both ways by stating that the mic works, but "if it doesn't", anyone who buys it is screwed. IMO, a seller has the responsibility to have his products serviced and confirmed to be in good working order, or be willing to abide by the rules of the game if he accepts Payment by PayPal. That's part of the beauty of PayPal.. Seller gets his money immediately.....buyer has recourse if he gets crapped on. Am I being an asshole here?

You're not an A hole - more like a G# hole. No, you're in the right. The mic is broken, duh.

My advice for next time: if a guy spells that poorly he probably has no idea if a mic is in "very good working condition".

I especially like the part where he applies phantom power and calls it good. This was a sequentially numbered pair out of a lot of 5. I haven't seen feedback from the other buyers yet. I will say that this pair of mics reproduces a signal (or at least *reproduced*) a much truer replication of the original signal than any instrument mic I've ever heard, though I admittedly haven't heard them all.

;o)

You're completely in the right. I'd contact ebay as well and ask to have your feedback removed until the issue is resolved and then repost.

It's much more fun buying from you, where things are always in slightly better shape than expected as well as a couple days early. The guys in my band say between you and Neil we're going to have to have to build out the studio by adding the Thad Brown Paris Newsgroup Castoff Microphone Wing ;-)

TCB

Hey Thad,

He left reciprocal good feedback and I'm going to leave it at that for now. He's already got a few dings, but those were for slow shipping. I'll take this up with EBay if he behaves like a total turd about this. right now, I think the reality of his plight may be sinking in so I'm going to give him a little time to cool his jets. Since PP is a subsidiary of EBay, I think I might be able to get some cooperation...maybe. It looks like feedback can only be rescinded on EBay with the approval of both parties.

Keep an eye open for that ribbon mic. It should show up late week.

enjoy,

;o)
Deej

Get your money back - you're not being an asshole at all...
the bastard misrepresented the item by feigning ignorance of a
problem.

Neil

Hopefully the capsule is good and the mic can be fixed. I have fallen in love with KM84's. If the capsule is damaged and would be prohibitively expensive to fix (which is likely if it's damaged), I will definitely want my money back..

;o)

Just get your money back now - there are perfectly useable '84's out there for sale that you won't have to pay Nuemann their ungodly sums to repair after you buy 'em.

My opinion, anyway.

P.S. - what don't you like about your '184's that you'd rather have a pair of '84's? Have you been hanging around on r.a.p. lately? You know, the place where anything that has a frequency response above 16k seriously disturbs the vast majority of the posters therein? lol

Haven't visited RAP for years actually. I do like the 84's. the sound much more true to the source than my 184's for close micing. I need to give the 184's at least 4' to get happy with the way they sound on wood instruments. The 84's sound magnificent.....right before they go Pffftttt!!!!

;o)

KM84's are probably the best mic on the planet for acoustic guitar, piano, and drum overheads and they do a lot more than those things extremely well. I sold my stereo pair last year because they had gotten so valuable and I really wanted a National Tricone...

BTW, I got one repaired (bad amplifier, not capsule) by Neumann for a couple hundred, so the repair may not be as expensive as you think.

DJ,
This is a "broken capsule due to humidity ,one main reason.
Youave these to options except from servicing it somewhere.
First you can turn around th capsule and use the mic in cardioid mode so the
"broken"side of the capsule will be in back.
ust unscrew the capsule and turn it 180o degrees and screwit again.
DO NOT TOUCH the membrane !!!
The other option is to "fix"the capsule !!

Yes.

Put the microphone without head cover (watch not to touch again) under a lamp that produces heat.

Not much as you can burn it but s much as you can feel comforting the heat coming out of the lamp.

Leave it there for 2-3 days.

Maybethis will cure the capsule problem.

Hope thse help.

Regards,

Dimitrios

I've heard of that heat trick... but frankly if I wasn't in a rush to use it, I'd rather stick it in a ziplock bag with a few packets of silica gel for a week.

IF that's what the problem is.

Neil

Both these mics have been sent to Neumann for a full eval. I had a
correspondence with Klaus Heyne about this issue and he thought that
Neumann could probably fix this issue in about an hour.. If so, I'm going to
hold the seller's feet to the fire. If the capsule is hosed, I'm going ask
for my money back. I checked the other capsule on both amps, and it works
great, as do the amps (apparently).

Dimitrios,

That only works when the capsules are dirty and only for a little while. Usually on vocal mics from dried spit and food that has built up on the diaphragm and is causing it to short when the humidity goes up. DJ's mics actually have a broken pin on the capsule.

Dimitrios wrote:

Where DJ lives, leaving on the counter will achieve the same result... ;-)

David.

That true. Until yesterday, humidity levels were around 5%. The first of the rains arrived yesterday. It was great. The wind shifted and started blowing from the south and all that moist warm air from Baja was sucked right up into the valley here, collided with the cold air up in the mountains to the north of us and we had a nice one. I can even see a little bit of snow on the peaks up around 10,000' feet. Hopefully that will start happening every afternoon until September. If it does, that would be a normal weather pattern for this area.

;o)
